PATENT AND TRADEMARK OFFICE NOTICES

Priority Papers

Applicants, their attorneys, and agents are reminded of the suggestion found in Section 201.14(a) of the Manual of Patent Examining Procedure that a pencil notation of the Serial Number of the corresponding U.S. application be placed on priority papers filed under 35 USC 119. Such notation should be placed directly on the priority papers themselves even where a cover letter is attached bearing the U.S. application data. Experience indicates that cover letters and priority papers occasionally become separated, and without the suggested pencil notations on the priority papers, correlating them with the corresponding U.S. application becomes exceedingly difficult, frequently resulting in severe problems for both the Office and applicant. Adherence to the foregoing suggestion for making a pencil notation on the priority document of the U.S. application data will result in a substantial lessening of the problem.

WILLIAM FELDMAN,

NATIONAL BUREAU OF STANDARDS

Office of Energy-Related Inventions

Notice of Establishment

Notice is hereby given of the establishment of the Office of Energy-Related Inventions, Institute for Applied Technology, National Bureau of Standards, to carry out the responsibilities imposed by section 14 of the Federal Nonnuclear Energy Research and Development Act of 1974 (Public Law 93-577, dated December 31, 1974, 88 Stat. 1894). Set out below is a statement which furnishes the reasons for the establishment of that Office, the address to which communications may be sent, a description of its functions, and a set of procedures which are designed to assist persons in submitting energy-related inventions to the National Bureau of Standards for evaluation.

Regulations governing the evaluation of energy-related inventions are being developed. Upon their development the proposed regulations will be published in the Federal Register to allow a reasonable period for public review and comment. After appropriate review and consideration of the comments received, the regulations will be duly promulgated in the Federal Register.

OFFICE OF ENERGY-RELATED INVENTIONS

1. *Purpose.* The Federal Nonnuclear Energy Research and Development Act of 1974 (Public Law 93-577), hereinafter referred to as the Act, establishes a comprehensive national program for research and development of all potentially beneficial energy sources and utilization technologies. The program is to be conducted by the Energy Research and Development Administration (ERDA).

Section 14 of the Act directs the National Bureau of Standards (NBS) to "give particular attention to the evaluation of all promising energy-related inventions, particularly those submitted by individual inventors and small companies for the purpose of obtaining direct grants from the Administrator" of ERDA. The Office of Energy-Related Inventions (OERI) has been established in the National Bureau of Standards to carry out the duties required under this directive.

2. *Address.* The address of OERI, to which all inquiries and communications pertaining to NBS responsibilities under section 14 of the Act may be sent, is as follows:

Office of Energy-Related Inventions
National Bureau of Standards
Washington, D.C. 20234

3. *Functions.* The functions of OERI in carrying out its responsibilities shall be to:

3.1. Receive and process material and correspondence which describe energy-related inventions, hereinafter referred to as invention(s), and which request the evaluation thereof;

3.2 Conduct analyses to ascertain the technical and commercial feasibility of inventions submitted for evaluation;

3.3. Formulate recommendations to ERDA based on the analyses of submitted inventions;

3.4 Keep ERDA informed on the submission of inventions and results of evaluations;

3.5. Notify each submitter of an invention as to the results of the evaluation;

3.6. Conduct an information program to make the public aware of the invention evaluation service to be provided;

3.7. Correspond with inventors and members of the public as required;

3.8. Develop and promulgate regulations governing the evaluation of inventions; and

3.9 Perform such other functions as may be necessary to fulfill the responsibilities assigned to OERI.

4. *Procedures for submitting inventions for evaluation.* Each person desiring to submit an invention to NBS for evaluation pursuant to section 14 of the Act shall, in accordance with the procedures set forth below,

4.1 Obtain an Energy-Related Inventions Evaluation Request form (NBS-1019), hereinafter referred to as the Request form, by writing to the address set out in section 2 above. The form will provide:

(a) Detailed instructions for use in submitting an invention for evaluation;

(b) A description of the evaluation program and a statement of policy;

(c) A Memorandum of Understanding to be signed by the submitter as a prerequisite to accepting an invention for evaluation; and

(d) Space for submission of basic information on the invention and an outline of the complete disclosure information required.

4.2. Complete the Request form as instructed in section 3 of the form.

4.3. Prepare a detailed disclosure of the invention in an appropriate format, including the requirements specified in the Request form.

4.4. Mail the original Request form and a copy of the invention disclosure to the address set out in section 2 above. Receipt will be acknowledged by mail and, if all information is in order, the invention will be evaluated.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See Rules 2.101 to 2.105.

A separate fee of twenty-five dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sept. 1, 1973 rather than the international class which applies to applications filed on and after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of June 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sept. 1, 1973 rather than the international class which applies to applications filed on and after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of June 26, 1973 (911 O.G. TM 210).
